FIND YOUR NC MX-5 DONOR CAR TO BUILD YOUR SMX

THE AMOUNT YOU'RE GOING TO PAY FOR YOUR DONOR PROBABLY DEPENDS ON HOW PATIENT YOU ARE, AND HOW MUCH WORK YOU PUT INTO BOTH FINDING A DEAL AND PREPPING THE CAR.

THE ARTICLE [HERE](#) OUTLINES MANY PURCHASING CONSIDERATIONS (E.G., ONE CAN CONVERT AN AUTOMATIC TRANSMISSION DONOR CAR TO A MANUAL TRANSMISSION. CALL 800.435.2508 FOR GUIDANCE).

PARTS SPOTLIGHT: FINDING AN NC MAZDA MX-5 DONOR CAR FOR SPEC MX-5

In a series of Mazda Motorsports Parts Spotlights, we've discussed the benefits and thought processes behind the package of parts that make up the Spec MX-5. This article highlights the considerations for selecting the NC generation (2006-2015) Mazda MX-5 donor - the most important portion of your Spec MX-5 build.

When searching for your donor, the amount you're going to pay probably depends on how patient you are, and how much work you want to put into both finding a deal and

prepping the car. There are many options to find the perfect starting point, whether you are a budget-minded enthusiast or prep shop collecting and preparing a fleet. Below are many of the considerations when making your selection.

The NC Chassis: Face Lifts and Trim Packages

The NC chassis received two face lifts throughout its production (2006-2015), creating what is commonly referred to as the NC2 (model years 2009-12) and the NC3 (model years 2013-15). While primarily visual differences, there are a few prominent changes that can prove valuable to a race build.

Although updates were made to engine internals, electronics, and with the '13+ models ECU tune, they play no factor with the new Spec MX-5. Instead the focus turns on the single most notable difference: the transmissions.

Most of the NC manual transmission packages are equipped with the 6-speed transmissions, the Sport level is produced with the 5-speed manual transmission, which would need to be changed for the class.

For cars older than the 2009 model year, it's recommended to look into upgraded forks that are now available. While great on the street, the early transmissions needed some help to stand up to track-level abuse, which was quickly fixed.

The only other prominent option to watch out for is the factory "suspension package." These packages came equipped with
